

**Material Handling Operative
(Ref ID: MHO1124)**

Founded in 1997, McAuley Engineering is built on values of integrity, quality, and community. We are dedicated to the continuous development and improvement of our team.

We are looking for a team player with a 'can-do' attitude to join our Material Handling team. This team plays a crucial role in ensuring our production line is consistently supplied with the necessary materials, handling kitting and dispatching to both internal and external customers as required.

We are offering a Material Handler position with the following options:

- **Part-time:** 20 hours per week, spread over 4 days (Monday to Thursday).
- **Full-time:** 38 hours per week, spread over 4 days (Monday to Thursday).

Key Responsibilities:

- Safely and orderly handle materials
- Assist with the timely fulfilment and delivery of products
- Collaborate with team members to achieve set goals
- Foster a company culture that values diversity, creativity, and innovation

Required Skills:

- Strong communication and organizational skills
- Basic understanding of computerized stock control systems
- Proficient in written and verbal English
- Knowledge of health, safety, and environmental requirements for material handling
- High accuracy and attention to detail
- Timely and effective task performance
- Experience in kitting fabricated components
- Confident computer literacy
- Forklift operation experience is a plus

The Ideal Candidate:

- Positive and upbeat, with strong interpersonal skills to communicate at all levels
- Self-motivated with high levels of initiative

Benefits: Enjoy a 4-day work week, on-site parking, and a supportive, inclusive work environment. We offer opportunities for professional development and career advancement.

How to Apply: To obtain an application, please contact us at 028 2766646. Use the "Information in support of your Application" section to detail your relevant experience and how you meet the criteria.
